

3685 – TriSolv Poster Paper Prime 135 SA Glossy

Composition

TriSolv Poster Paper Prime 135 SA Glossy is a permanent self-adhesive paper with water-repellent surface and a robust liner. The adhesive is a water based dispersion without addition of solvents.

Intended use

Self-adhesive poster paper for advertising applications, stickers and labels. Suitable for printing with solvent, latex and UV-curing inks.

Storage

To preserve the best quality of the product, it should be stored in its original packaging. Conversion should take place in a climate between 30 and 65 % relative humidity, at a temperature between 10 and 30°C.

Health and safety

To the best of our knowledge this product causes no health or safety hazard, if used the way intended. In principle, there is a potential risk of cuts on all sharp edges. Cotton or other gloves are recommended for protection.

Fire hazard

In case of fire, air-independent breathing equipment should always be available. Burning organic material generally leads to the formation of carbon monoxide (CO), carbon dioxide (CO₂), other hazardous substances and dense smoke.

Disposal

Small quantities may be disposed of with normal household waste. Larger quantities should be disposed of according to local or national regulatory requirements. We recommend to contact your local waste disposal authority.

Regulatory information

TriSolv Poster Paper Prime 135 SA Glossy is not subject to the regulations on transport and labelling that apply to dangerous substances.

The product is in compliance with RoHS directive 2011/65/EU, incl. amendment 2015/863/EU.

The product is in compliance with REACH Regulation (EC) No 1907/2006. According to REACH the product is an article. This article does not contain substances of the SVHC candidate list of June 25, 2025, in concentrations above the notification threshold of 0.1 wt-%.

This article does not contain substances listed in ANNEX 14, nor substances listed in ANNEX 17 that exceed the applicable threshold values.

The above-mentioned product does not contain any intentionally added PFAS (per- and polyfluorinated alkyl substances) according to the ECHA provisional definition. We cannot exclude the possibility of ubiquitous traces or impurities from production processes of our suppliers.

This product is in compliance with the Dodd-Frank Act and EU Regulation (EU) 2017/821. None of the 3TG elements (tantalum, tin, tungsten and gold) are used in the manufacture of the above product, nor do we expect our suppliers to use them in our raw materials.

The above-mentioned product does not contain any substances classified as persistent organic pollutants according to Regulation (EU) 2019/1021 (and subsequent amendments) or the Stockholm Convention, nor do we assume that our suppliers use these substances in our raw materials.

Additional information

None

Company certificates

Sihl GmbH is certified according to ISO 9001, ISO 14001, ISO 45001, ISO 50001, and FSC® C005732.

This version replaces all previous versions.

Everything in this material safety information corresponds to our current understanding and is compiled to the best of our knowledge. All raw materials used in the manufacture of this product are carefully selected. We consider all available information from our raw material suppliers, especially with regard to regulated chemicals. Therefore, we do not expect any substances to be present in quantities exceeding the legal requirements mentioned. However, we typically do not conduct analytical controls. This information is neither a product specification nor any type of warranty or guarantee and does not release from the obligation to conduct your own inspection and testing of the function or applicability.

We reserve the right of unannounced changes in case of further (product-) development or technical progress.
