Holdon® XTRA

Clip-On Eyelets - Makes 'eyeleting' applications easier, faster and stronger!

The neatest version of the powerful 'clip-on eyelet', grip tested to 45 kg, for commercial use and retail distribution. A high quality, innovative, precision made Swedish fastener, designed to make 'eyeleting' applications, easier, faster and stronger!

- ▶ **Instant grip - no hole punching, tools or hemming required**
- ▶ **Stronger than traditional eyelets**
- ▶ **Grip tested to 45 kg**
- ▶ **Reusable / easy to remove**
- ▶ **Stable in wet conditions**
- ▶ **Ergonomic one hand attachment**
- ▶ **Large hole for cord/hook**

Functionality

Holdon® Clip's grip function is based on the highly efficient principle of the wedge. As the cord or hook threaded through the 'eye' of the clip is pulled, it forces the wedge component into the sleeve, increasing the 'gripping effect' between the wedge and the gripping area of the sleeve. The more you pull, the tighter the grip. Windy conditions actually increase the grip!

Unlike eyelets and some other clips, Holdon® XTRA does not require a hem to increase grip.

Technical Specifications

Colours:	black, grey, white
Dimensions:	50 x 37 x 10 mm
Media thickness:	up to 1.5 mm
Weight:	9,0 g
Load capacity:	up to 45 kg
Material:	Metal Replacement plastic with nylon and fibreglass blend

Recycling Possibilities; with PVC banners - can be recycled as plastic material and are free of heavy metals, anti-corrosives, chlorides and phthalates.
